Projects

KiloBoy Artwork-Artist gallery/ e-commerce website   Dec '25

github.com/MOGARRR/miles | Under-Development

- Full-stack e-commerce application built with modern web technologies, focusing on payments, shipping, email automation, and scalable backend architecture.
- Built backend API routes using Next.js, structured with controllers and services.
- Designed and connected a Supabase database for frontend and backend usage.
- Integrated Stripe for payments, including shipping and tax calculations.
- Implemented shipping rates and label creation using Shippo's API.
- Added transactional emails using Resend.

Portfolio Website   Aug '25

anthonya-portfolio-website.onrender.com/ | Web Developer Portfolio

- A personal portfolio built with React and Vite, showcasing projects, skills, and contact information. Designed with a responsive layout and interactive UI effects for an engaging user experience.

Decision Maker – Poll Creation/Voting Application

github.com/Amga20d/decision-maker

- Developed a full-stack polling app using Node.js, Express, and PostgreSQL, enabling users to create and share polls for gathering group preferences. Implemented real-time voting updates via emails and a responsive UI with EJS and CSS.
- Integrated Mailgun API for email notifications.
- Implemented drag-and-drop voting to rank options.
