PROJECTS

Decision Maker – Poll Creation/Voting Application

Github: https://github.com/Amga20d/decision-maker

Developed a full-stack polling app using Node.js, Express, and PostgreSQL, enabling users to create and share polls for gathering group preferences. Implemented real-time voting updates via emails and a responsive UI with EJS and CSS.

- Integrated Mailgun API for email notifications.
- Implemented drag-and-drop voting to rank options.

Jungle Rails – E-commerce Platform

Github: github.com/MOGARRR/jungle-rails

Built a feature-rich online store using Ruby on Rails and PostgreSQL. Implemented product browsing, cart functionality, and admin features with authentication and session management.

- Developed models, controllers, and views for product and category management.
- Implemented user registration and login with secure session handling.
- Added admin dashboard for inventory and order management.
- Utilized Rails ActiveRecord for database interaction and query optimization.

PhotoLabs – Photo-Sharing App with Likes and Favorites

Github: **https://github.com/MOGARRR/PhotoLabs**

Developed a responsive photo-sharing platform where users can browse curated images, mark favorites, and explore content interactively. Built with a focus on component-driven design and clean UI.

- Developed a dynamic photo grid with real-time filtering and UI feedback
